

SOMRAJ DEB

SOFTWARE ENGINEERING | FULL STACK DEVELOPER | AI AUTOMATION

Agartala , Tripura | +91 9366653268 | somrajdeb70@gmail.com | [Github](#)

ABOUT

Software engineering student with experience designing ,building and deploying full-stack web applications and AI automation systems. Built production-ready SaaS products using React,TypeScript,Node.js, Supabase, Mongodb, n8n and AI APIs. Interested in backend systems, distributed applications and machine learning infrastructure.

PROGRAMMING LANGUAGES & TECHNICAL SKILLS KNOWN

- Java
 - Python
 - C++
 - Javascript
- React.js
 - HTML
 - CSS
 - SQL
- Node.js
 - Express.js
 - Supabase
 - MongoDB

PROJECT & EXPERIENCE

Corporate company Websites

Jan 2025 - Present

React • TypeScript • Tailwind CSS • HTML • CSS

- Built 4 responsive corporate website for Corporate Companies.
- Designed modular frontend components for scalability and maintainability.
- Implemented contact forms and modern UI patterns.

WordPress E-commerce Website

may 2026 - june 2026

WordPress • WooCommerce • PHP • Elementor

- Designed and deployed a complete e-commerce platform using WordPress and WooCommerce.
- Customized themes, layouts, and product pages to improve user experience.
- Configured payment gateways, product catalog management, and order workflows.
- Optimized website performance, responsiveness, and SEO.

AI Agent Receptionist (Via N8N)

may 2025 - june 2025

React • TypeScript • n8n • Retell AI • Google Calendar API

- Built an AI-powered voice receptionist to automate customer interactions and appointment booking.
- Integrated voice AI, Google Calendar, and email notifications into a unified workflow.
- Developed a responsive dashboard for managing appointments and customer interactions.
- Designed modular automation workflows using n8n for business process automation.

NIC Agartala NextGen HRMS Visitor Module (Internship)

may 2026 - july2026

- Full-Stack SPA: Built a multi-role visitor management system using Spring Boot and JavaScript.
- Logic Engine: Developed an automated scheduling algorithm for dynamic time-slot generation.
- API Integration: Engineered RESTful APIs with PostgreSQL for real-time visitor log tracking.

Weather Forecast Desktop App:

Nov 2025

- Developed a Python-based GUI application using Tkinter that fetches and displays real-time weather data (temperature, humidity, wind) for any userspecified city via the wttr.in API and Requests library

AiFest Hackathon participation:

Oct 2025

- Participated in Aifest Hackathon in Chandigarh University.

EDUCATION

B.Tech – Computer Science Engineering

2024 - 2028

- Chandigarh University (2024 – 2028)
- CGPA: 7.0

Senior Secondary (Class XII)

2022-2024

- Sri Sri Ravishankar Vidya Mandir (2024) – 81%

Secondary (Class X)

- Holy Cross School (2022) – 89%

ADDITIONAL INFORMATION

- **Languages:** English, Bengali, Hindi.
- **Certifications** : Python Data Analytics (meta) ,Artificial Intelligence and Business Strategy,Agentic Artificial Intelligence,Using Databases with Python(University of Michigan ,Introduction to Internet of Things (secured 90%) and more . **Certifications Drive link** .
- **Github link**
- **Hackerrank Account Link**
- **Leetcode account link**
