

ABOUT

Full-stack software engineer experienced in building and deploying production-ready web applications and AI-driven automation using React, TypeScript, Node.js, Spring Boot, Supabase, MongoDB, PostgreSQL, and n8n. Turns business requirements into scalable software — from RESTful APIs and database-backed systems to AI voice agents and automated workflows that cut manual effort and boost customer experience. Brings a track record of shipping real products for clients and is ready to help a team build robust, high-impact software faster.

- PROGRAMMING LANGUAGES & TECHNICAL SKILLS
- Java
 - Python
 - C++
 - JavaScript

- React.js
 - HTML
 - CSS
 - SQL

- Node.js
 - Express.js
 - Supabase
 - MongoDB

- PROJECT & EXPERIENCE
- NIC Agartala — NextGen HRMS Visitor Module (Internship)

May 2026 – Jul 2026

Spring Boot • JavaScript • PostgreSQL

 - Built a full-stack multi-role visitor management SPA using Spring Boot and JavaScript, with an automated scheduling algorithm for dynamic time-slot generation.
 - Engineered RESTful APIs integrated with PostgreSQL for real-time visitor log tracking.

WordPress E-commerce Website

May 2026 – Jun 2026

WordPress • WooCommerce • PHP • Elementor

 - Designed and deployed a complete e-commerce platform using WordPress and WooCommerce, customizing themes, layouts, and product pages to improve user experience.
 - Configured payment gateways, product catalog management, and order workflows, and optimized site performance, responsiveness, and SEO.

Corporate Company Websites

Jan 2025 – Present

React • TypeScript • Tailwind CSS • HTML • CSS

 - Built 4 responsive corporate websites using modular, scalable frontend components.
 - Implemented contact forms and modern UI patterns for corporate clients.

AI Agent Receptionist (via n8n)

May 2025 – Jun 2025

React • TypeScript • n8n • Retell AI • Google Calendar API

 - Built an AI-powered voice receptionist to automate customer interactions and appointment booking, integrating voice AI, Google Calendar, and email notifications into a unified workflow.
 - Developed a responsive dashboard for managing appointments and designed modular n8n automation workflows for business process automation.

Weather Forecast Desktop App

Nov 2025

 - Developed a Python-based GUI application using Tkinter that fetches and displays real-time weather data (temperature, humidity, wind) for any user-specified city via the wttr.in API and Requests library.

AI Fest Hackathon Participation

Oct 2025

 - Participated in the AI Fest Hackathon at Chandigarh University. Made a project Using MLops.

- EDUCATION
- B.Tech — Computer Science Engineering, Chandigarh University

2024 – 2028

• CGPA: 7.0
- Senior Secondary (Class XII), Sri Sri Ravishankar Vidya Mandir (CBSE)

2022 – 2024

• Score: 81%
- Secondary (Class X), Holy Cross School (ICSE)

2022

• Score: 89%

- ADDITIONAL INFORMATION
- Languages: English, Bengali, Hindi.
 - Certifications: Python Data Analytics (Meta), Python (Google) , Artificial Intelligence and Business Strategy, Agentic Artificial Intelligence, Using Databases with Python (University of Michigan), Introduction to Internet of Things (90%), and more — Certifications Drive link.
